Since 1980, our company has been engaged in **civil and industrial technological systems**, working in all areas with one philosophy: to put into action our expertise for your well-being making the environment in the places in which you live and work comfortable and functional, to improve the energy efficiency and to enhance the quality of life. We welcome the changing needs of society, technology and legislation in the field of energy efficiency, drawing on the extensive knowledge and experience gained and our strengths in the areas of large **industrial, geothermal, solar thermal, biogas and solar cooling plants**.

By nature we recover all of its energy

A KNOW HOW which has enabled us of **ZARANTONELLO S.r.l.** to be present on the market with cutting edge products and a high specialization in different systems, directly advising and designing the best solutions for our customers, by means of an efficient technical department. The focus on the requirements of our customers and of the market, has contributed to a steady growth over the years strengthening our experience and capacity to innovate and evolve.
